

Ohio's Technology Future In Agriculture Depends on You

Are you interested in emerging technologies used for decision making in agriculture?

| | |
|------------------------------|---------------------------------|
| Precision Agriculture | Internet and Web Sites |
| Remote Sensing | E-business/E-commerce |
| Computers and Hardware | Bio-Technology |
| Agricultural Software | GPS/WAAS |
| Farm/Business Record Keeping | Geographic Information Systems |
| Communication/Data Systems | and other emerging technologies |

Become part of an association that is driven by producers, consultants, agri-businesses, agri-retailers and cooperatives, equipment dealers, researchers, educators, and others. Work with others to collectively share ideas, solve technology issues, and identify new areas for research and/or collaboration.

Indicate your interest by registering at our web site at <http://agnr.osu.edu/oata> or getting in touch with your local Ohio State University Extension Agriculture and Natural Resources Agent.

Make an Impact

- ▶ Stay abreast of emerging technologies
- ▶ Address agricultural technology policy issues and standards
- ▶ Learn about specific technologies and their applications
- ▶ Explore on-farm research opportunities
- ▶ Assist with technology research and education
- ▶ Facilitate an annual technology conference
- ▶ An association web site and electronic mailing list for accessing information, education and facilitating timely discussions
- ▶ and much more
