New Sprayer Technologies and Best Spraying Practices Work- shop: Vineyards and Orchards

Save the date for an upcoming workshop on effective crop protection and spraying practices for vineyards and orchards. This workshop will feature presentations on best spraying practices using conventional sprayers and new sprayer technology. The afternoon will provide field demonstrations showing adjustments to improve effectiveness of conventional sprayers as well as demonstration of new efficient sprayers including drones, autonomous sprayer units, intelligent sprayers for variable-rate application, and adaptable technology. This workshop is being developed by Ohio State University Extension specialists and the USDA-ARS Application Technology Research Unit team.
